PROJECTS / OPEN-SOURCE

youtube-clone | [Link](#)

CSS, JavaScript, HTML

Developed a dynamic YouTube-like platform using React.js, JavaScript, HTML, and CSS. Implemented video uploads with Firebase Storage, user authentication with JWT, and a responsive UI for an optimal viewing experience. Integrated features like video playback, likes, comments, and search functionality to enhance user engagement.

Google-sheet-clone | [Link](#)

JavaScript, HTML, CSS

Built a single-page replica of Google Sheets using JavaScript, HTML, and CSS. Developed an interactive grid-based spreadsheet with cell editing, formatting options, and basic formula support. Ensured a responsive design and smooth user experience through efficient DOM manipulation and event handling.

Food-munch | [Link](#)

HTML, CSS

Designed and developed a visually appealing food website using HTML, CSS, and Bootstrap. Created a responsive and user-friendly interface showcasing various food items, menu sections, and call-to-action buttons. Implemented smooth navigation and an aesthetically pleasing layout to enhance user engagement.

blinkit-clone | [Link](#)

Bootstrap, Html

Developed a responsive clone of Blikit using HTML and Bootstrap, replicating its design and layout with precision. Utilized Bootstraps grid system and components for a clean, structured interface. Ensured mobile responsiveness and cross-browser compatibility for an optimal user experience.
